Projects

- Inkelligence (Ongoing)** | ReactJS, TailwindCSS, Turborepo, Express, PostgreSQL,WS
- A collaborative, canvas-based application designed to help users arrange and design various elements seamlessly. Inspired by Excalidraw, this application takes it a step further by integrating an LLM-powered workspace tracker.
- LaterGram** | ReactJS, TailwindCSS, Express, MongoDB, JsonWebToken
- An application that serves as a **second brain**, allowing users to store important links and posts for future reference. It acts as a personal knowledge hub, enabling users to effortlessly organize and revisit valuable information whenever needed.
 - Future Work:** Enhancing the application with **RAG-based searches** to enable intelligent retrieval of stored content, making it easier for users to find relevant information within their personal knowledge space.
- Chess** | ReactJS, TailwindCSS, Express,WebSockets
- A simple and intuitive platform for playing chess, designed for casual gameplay without the use of a chess engine. It provides a seamless experience for players to enjoy the game in its purest form.
